

## FAQ's Cymex Cream | FAQ's Cymex Ultra

### Can the infection spread to other parts of my body?

Yes, cold sores are highly contagious and can spread to other areas. This is particularly worrying if it spreads to the eye as it can cause inflammation to various parts of the eye and cause infections such as conjunctivitis or even lead to blindness if left untreated.

### Will the virus go once the cold sore has disappeared?

If you have the Herpes Simplex Virus you will always have it. However for some people it can lay dormant within the central nervous system and never reactivate to cause cold sores.

### How long will it take for my cold sore to clear?

Most cold sores disappear within a week or so and generally heal without scarring. ([www.nhsdirect.nhs.uk](http://www.nhsdirect.nhs.uk))

### How often can Cymex Cream be applied?

Cymex Cream can be applied every hour as required.
